

**Amendments to the Specification**

*Please make changes to the second paragraph on page 1 as shown.*

The present invention relates to commonly-owned, co-pending United States Provisional Patent Application No. 60/433,742 [763066, Atty. Docket US020584], patent application titled, "Sliding Bias Circuit for Enabling Dynamic Control of Quiescent Current of a Linear Power Amplifier." Application No. 10/538,348, filed on June 10, 2005, the subject matter of which is wholly incorporated by reference herein.
